

A CHART SHOWING THE DISTRIBUTION OF FUSULINIDÆ AND FUSULINA LIMESTONES IN NORTH CHINA.

Explanation:— The rectangles represent the Fusulina Limestones with their local names written below in italics. Thick capitals refer to localities indicated on the maps in the left section. Shaded areas on the maps were from time to time under marine water during the respective epochs. Figures in the rectangles refer to species tabulated on the right. Thick figures indicate the dominant species.
